

Clean-Screen Curtain Walls

Manage Your Food Processing Environment

TMI's Clean-Screen curtain walls separate process lines and work stations, preventing cross-contamination between water and bacteria-sensitive environments.

Save Production Time and Money

Reduce down time and Maximize production and machine hours by separating lines and work areas.

Easy Glide Stainless Steel Hardware

The Clean-Screen's unique hardware system has an open-top design that prevents entrapment of contaminants, discourages bacteria growth, and eliminates rust, debris, and shaving build-up caused by traditional track and roller curtain systems.

Perfect for Food Processing Environments

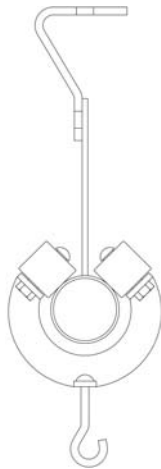

Clean-Screen curtains are comprised of USDA grade clear Low Temperature PVC, promoting visibility and safety in temperatures as low as -20° F.

Common Applications

Food Processing, Wash Down Areas, Clean Rooms, Car Washes, and more

TMI's new Clean-Screen and Easy Glide track system allow for safe, effective, and efficient wash down of sensitive machinery and equipment.

Standard Features:

- USDA grade, non-porous, .040" thick clear flexible PVC curtains with 12" overlap on trolley hooks
- Stainless steel grommets
- Stainless steel rounded rod track
- Open-top plastic rollers with trolley hooks
- Universal connectors for mounting to a ceiling, flush to a wall, or suspended with threaded rod.
- Top and bottom heat-sealed hems are used instead of sewn hems to create a weather-proof, reinforced seal that does not fray, tear, or allow for potential bacteria growth
- Optional stainless steel rollers
- Clean-Screen curtains are custom built to your application

For more information on TMI's new Clean-Screen curtain walls, contact your TMI Sales Professional or the authorized TMI distributor in your area.

Screens, Curtains, & Enclosures

TMI's Screens, Curtains, and Enclosures manage environments by creating a safer, more energy efficient workplace. They protect employees, customers, equipment, and goods from dust, dirt, fumes, light, temperature, noise, odor, and over-spray.

Industrial curtain walls aid in cutting energy bills by eliminating the need to heat or cool unused warehouse areas. They are the perfect alternative to permanent walls. Their flexibility and adaptability make TMI's curtains the best option for managing customer environments.
