

More Than a Curtain, it's a Turnkey Solution for Environmental Control

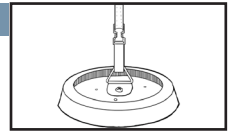

TMI's Industrial Curtains are an inexpensive solution for controlling environmental problems such as dust, temperature, humidity, smoke and noise. With a variety of optional accessories and hardware, TMI's curtains are made to meet your application's specifications.

Our versatile options and add-ons can be made to fit any order and any size. Call **800.888.9750** today for a personalized curtain quote.

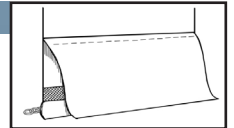

A Floor Mounted Curtain Fasteners

Sewn-in webbing straps fastened to 4" mounting plates keep your curtain secure and in place – even in high-wind environments.

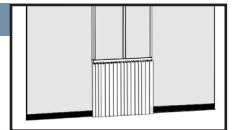

B Floor Sweep Attachment

For additional sealing between the floor and the curtain, a trim-able 36" chain weighted hem can be attached with sewn-in pressure sensitive hook and loop fasteners.

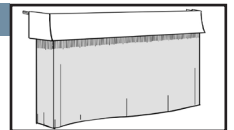

C Strip Door Walkthrough

Curtains can be outfitted with custom strip door walkthroughs. Walkthroughs allow for traffic with minimal air transfer and without the necessity of opening and closing the curtain.

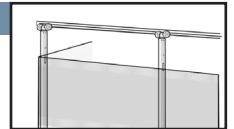

D Valance Curtain Panels

Additional valances can be easily attached to the top of any curtain for maximum area containment and protection against wind and airborne pollutants.

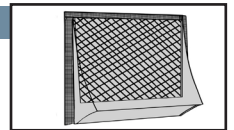

E Pipe Staff Stiffeners

For an extra layer of security, wind reinforcement pipes can be added to any curtain. Lock-up cane bolts and lock-down wall brackets can be used to fasten the pipes directly to the floor.

F Wind Pockets

For exterior applications with heavy wind, 29" x 27" wind pockets can be installed to help soften the force of strong wind gusts by diffusing and releasing it through mesh screens.
