

Pest Pro 100 UV Bug Light

The Series 100 Pest Pro is Curtron Products' solution for controlling insects in areas where a large bug trap would be both unsightly and unnecessary. The Pest Pro100 is a silent flying insect trap that blends almost effortlessly into any décor, as the metal casing is shaped as a wall sconce light.

It's a highly effective trap, drawing insects in with high intensity UV light and then capturing them on a glue board. Patrons and employees alike will not have to hear the "zapping" sound associated with more traditional bug traps. The Pest Pro 100 comes in both gold and white color models and effectively covers 900 square feet of space.
