

## READY-TO-HANG REPLACEMENT STRIP DOORS

RIP-A-STRIP™ is a continuous roll of PVC strip that is “kiss-cut” and hole punched at specific intervals. This patented TMI process cuts through 85% of the strip material thickness, allowing individual strips to be torn from the roll by hand as needed.

Each strip section has mounting holes punched at one end on 2” centers for installation on most strip door hardware systems, and strip length can be up to 16’ to fit any common or custom requirement.

RIP-A-STRIP™ lets resellers extend their service and prices to the level of the manufacturer because they can stock products on the roll and easily rip off strips as needed to fulfill replacement orders.

### FEATURES:

- “Kiss-Cut” material can be torn by hand into individual replacement strips as needed
- Pre-punched holes fit most popular strip door mounting hardware
- Choice of any strip length from 1’ up to 16’
- Choice of strip width from 4” up to 16”
- Continuous roll ideal for counter sales or for use on service trucks
- Dispenser box makes finding and distributing the right product fast and easy

### BENEFITS:

- Reduces cost of replacement strips by up to 35%
- No tools required— reduces installation time
- Less expensive with quicker delivery
- Individually marked concave/convex
- Easily dispensable
- Requires less storage space

### MATERIALS:

- Standard Grade
- Low-Temperature
- Ribbed
- Anti-Static
- Welding Grade

### COLORS:

- Clear
- Colored
- Polished
- Frosted
