

# RIP-A-STRIP™

## The Exclusive, Revolutionary Strip Door Product

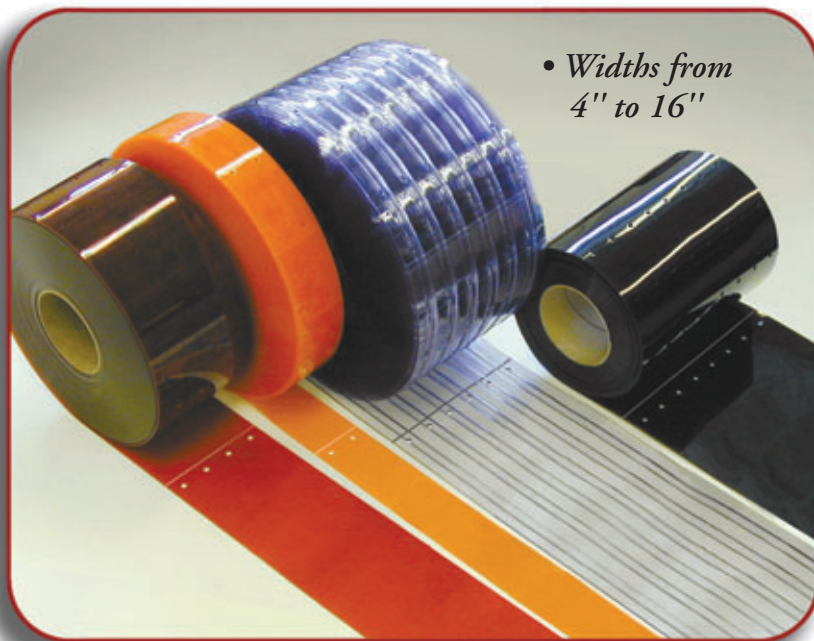

*The "RIP-A-STRIP" concept is so unique that only TMI, the world leader of flexible PVC products, could engineer this State-of-the-Future product.*

Since the introduction of Strip Doors in the late 1960's, not many new ideas have surfaced in the market with the exception of the revolutionary, patented, cost saving **RIP-A-STRIP**.

This process allows dealers and distributors to extend their service and prices to the level of the manufacturer. Distributors can stock products on the roll and easily **rip** off the number of required **strips**.

- *Kiss-Cut and Punched*
- *Easy to Rip*

- *Widths from 4" to 16"*

### Why use **RIP-A-STRIP**?

**RIP-A-STRIP** is a continuous roll of PVC strip material that is pre-cut and pre-punched to your specific length. The rolls are produced on State-of-the-Future machinery where the strips are pre-cut through 85% of the thickness (at your requested lengths up to 16'), mounting holes punched at one end on 2" centers, and rewound to the original shape. The process of pre-cutting is also referred to as "kiss-cutting".

**Cost Savings  
Up To 35%**
